4 Compare on held-out topologies

Refit selected procedures; predict before reading test quality labels.

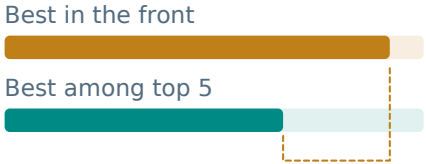

Same held-out candidates

Five supervised selectors

- **AMIGA · learn an order**
- Regression · predict AUPR
- Classification · top 5%
- Classification · top 10%
- Classification · top 20%

Assess the first 5

Missed quality = Regret@5

Separate panel: objective-only rules + exact random reference

The AUPR oracle is a nondeployable ceiling, not a competitor.

5 final training seeds

Equal weight per topology

Regret@5 primary · Friedman + Holm, per generator

No seed selection or prediction ensemble; all five final seeds contribute.
